telesign

WhatsApp messaging

Connect your business to the world's largest messaging app using Telesign's Omnichannel Messaging and Verify APIs.

Optimize the customer experience with secure, personalized, and programmable communications.

Verification

Security meets popularity. Deliver OTPs and verify your customers on the messaging platform they prefer.

Customer care and support

Delight your customers instantly. Respond to customer-initiated conversations and provide immediate support.

Real-time notifications

Timely messages matter. Use message templates to deliver the alerts, reminders, and notifications your customers depend on.

- Personalized business profiles and branded sender IDs
- Two-way and conversational messaging
- Automatic channel failover with native omnichannel integration
- Plug and play templates for A2P communications

- Support for rich media messages
- Compliance & onboarding support
- End-to-end encryption
- Sandbox environment for integration & testing
- True delivery and read receipts

Reliable, fast, & secure. Connect with your customers on their favorite channel.

Reach & engage more users

Be where your customers are. Make it easy for the 2+ billion WhatsApp users to reach and engage your business.

Communicate more effectively

Deliver end-to-end communication. Facilitate two-way conversations and keep your customers informed and secure. Do it all on WhatsApp.

Grow the business

Maximize your ROI. Unlock the power of WhatsApp to drive sales, improve customer satisfaction, and streamline operations.

Communication leader

Telesign is a pioneer of data-driven authentication and critical communication solutions that combine intelligence, analytics, and machine learning through the customer lifecycle.
